ONLINE RETAIL SALES ANALYTICS REPORT

Internship Project | Business Sales Performance Analysis

Executive Summary

The cleaned transaction dataset contains **524,878** valid sales line items. Across the analysis period, the business generated approximately **£10,642,110.80** in revenue from **19,960** orders and **5,572,420** units sold. The analysis identifies the strongest products and markets and highlights seasonal revenue patterns.

KPI	Value
Revenue	£10,642,110.80
Orders	19,960
Units Sold	5,572,420
Customers	4,338
Products	3,922
Average Order Value	£533.17

Data Cleaning

The raw data was deduplicated and filtered to exclude cancelled invoices, return/negative-quantity transactions, and non-positive unit prices. Missing Customer IDs were retained because they do not prevent transaction-level sales analysis; they are excluded from customer-level metrics.

Key Business Insights

1. Market concentration: United Kingdom is the largest market by revenue at £9,001,744.09.

2. Product concentration: The highest-revenue product is DOTCOM POSTAGE, generating £206,248.77.

3. Peak sales period: 2011-11 is the strongest month, with revenue of £1,503,866.78.

4. Order economics: Average order value is approximately £533.17, providing a useful benchmark for promotions and customer growth initiatives.

5. Customer data opportunity: A substantial share of raw records has no CustomerID, so improving customer identification would enable stronger retention and lifetime-value analysis.

Recommendations

1. Prioritize inventory and promotional activity around the highest-revenue products and strongest markets.

2. Use monthly sales trends to plan inventory, staffing, and marketing campaigns ahead of peak periods.

3. Investigate low-revenue or low-volume products for bundling, repricing, or removal from the assortment.

4. Improve customer-ID capture at checkout/order creation to support customer segmentation, retention, and lifetime-value analysis.

5. Track revenue, orders, units, and average order value together rather than relying on revenue alone.

Top 10 Countries by Revenue

Country	Revenue	Orders
United Kingdom	£9,001,744.09	18,019
